Our Constitution was established to prevent those inclined to abuse their wealth from seizing the powers of government for their own selfish purposes. Sadly, our elected representatives routinely fail to honor their oath of office and have handed our government and all its powers over to transnational corporate interests that have absolutely no allegiance to our country. Our representatives work solely for private corporate interests that ensure their $14,000 a month salary and perks keep flowing. We have one direct power over our government. The power to hire and fire. Until we cast our votes in a way that will be FELT, we have no power. **We must FIRE CONGRESS in the next election in order to make our will felt in the most undeniable way imaginable** and let it be known that those we elect are our **Public Servants**, not Rulers that can do whatever they please with utter impunity.
